About Siddharth Quest – 2K19

Most of us are unaware of the recent advances in Engineering because of changing technologies, software etc. Students should upgrade their knowledge and skills towards ever changing trends in engineering. This National Symposium focuses not only in coping up with the contemporary engineering world but also in viewing and estimating the future trends, technologies and use of latest software in the area of Engineering & Technology.

This National Level Technical Symposium would be a great opportunity for students to share and develop knowledge among themselves.
